

# A clear path to achieve more with your workloads on Azure

## Windows and SQL Server Migration on Azure: 6 Week Implementation

Like most IT organizations, you are spending 80% of your resources on just keeping the lights on. Faced with constant demands for more scale and reliability amid the ongoing threat of cybersecurity attacks, even that might not be enough.

With colocation contracts ending and hardware aging, it is the perfect opportunity to take advantage of the scalability, administrative, performance and security benefits of the cloud, while putting your organization on the path to innovation.

### Azure – Best Cloud For Windows And SQL Server

#### Unique cost savings

Save money when you apply Azure Hybrid Benefits to your existing investments and save even more with free extended security updates

#### Industry leading security

Benefit from Microsoft's investment into building security and compliance into a cloud platform you can trust

#### Unparalleled innovation

Accelerate infrastructure modernization with features that enable you to simplify administration and open new possibilities with a comprehensive set of services

## SNP's Proven Approach To Migration

These workloads are the backbone of many ecosystems and a seamless migration is critical. With the experience of doing 100s of successful migrations, SNP has a proven approach to help you solve the most pressing challenges and deliver the reliability, performance, and security you expect.

#### Introduction Meeting

- **Plan** implementation timeline, roles, and responsibilities
- **Review** suggested architecture and cloud services needed

#### Migrate

- **Test** migration with a small-scale database and environment (if possible).
- **Optimize** migration process by determining possible implementation issues in the test phase
- **Migrate** the database to Azure, in line with your workload requirements

#### Test

- **Assess** security and performance

#### Final Deliverables

- Fully operational and secure cloud environment for your workload.
- Documentation of new environment: Scripts, credentials and any other knowledge transfer.
- Post migration documentation

 **Time To Implement:**  
6 Weeks

 **Cost:**  
\$25,000 (Estimated)

“This project has been one of the most challenging and significant accomplishments of my career. I am incredibly grateful to have had the opportunity to work with the SNP team on the project. The depth and breadth of knowledge within SNP are second to none. The SNP team have been amazing from start to finish. Their understanding of the subject matter, attention to detail, dedication, and persistence have been on point throughout the project. I look forward to future projects/engagements.”

CTO of a Leading Global Law Firm

## About SNP Technologies Inc.

Microsoft Gold Certified Partner in Data Platform, Data Analytics, Cloud Platform and Datacenter with Advanced Specializations in Windows & SQL Server Migrations to Azure and Modernization of Web Applications to Azure.
